The MEIKO bottle washing system

Wash reusable bottles with M-iClean UM and UM+

The clean solution

The MEIKO bottle washing system

You can count on MEIKO to have the big picture in mind: **Healthy people and a healthy planet.** Our advanced technology balances absolute cleanliness and safety with optimal energy and water conservation. For years we've been dedicated to designing environmentally responsible warewashing equipment, and now we're growing our sustainable product line with a professional cleaning solution for reusable bottles.

Meet the MEIKO bottle washing system: a specially designed rack and adapter for all *M-iClean UM and UM+* undercounter dishwashers.

As more high-end hotels, restaurants and event venues shift to eco-friendly measures, like offering beverages to patrons in glass bottles or carafes instead of single-use plastics, the need for an efficient, hygienic way to wash reusable bottles has intensified – and we have the clean solution.

Take the professional path to a cleaner future with MEIKO's bottle washing system.

BENEFITS:

- Significant labor and time savings compared to manual bottle washing*
- Can be retrofitted to any MEIKO ***M-iClean UM/UM+***
- Easily switch between washing bottles and standard washware (glasses, plates, silverware, etc.)
- Bottles washed in accordance with hygienically safe, NSF-compliant standards
- Suitable for standard-sized glass and plastic bottles**

*Based on internal tests comparing manual cleaning to machine usage.
**Size requirements listed on back page.

MEIKO
The clean solution

One footprint, two powerful machines

Since its U.S. introduction in 2016, the award-winning *M-iClean U* undercounter dishwasher has consistently delivered premium wash results in commercial kitchens across the nation. Glassware, dishes and cutlery come out brilliantly clean, clear and dry every time. This new generation of *M-iClean U* achieves its superior clean by using fewer resources and more ingenuity than our previous model.

And now our *M-iClean UM/UM+* machines wash bottles with a simple switch of components. Just replace the bottom wash arm with the adapter and insert the bottle rack to turn your dishwasher into a bottle washing machine. Our adapter system uses separate, sealed channels to first send wash water, and then rinse water, to specially designed nozzles positioned at the opening of each bottle in the rack. This guarantees that the full power of the jet sprays inside the bottle – ensuring that ***every*** surface of the bottle is hygienically cleaned.

For all standard bottle sizes and shapes*

*Size requirements listed on back page.
